**RESEARCH
HIGHLIGHTS**

Building a Twitter Scraper & a Prototype Dictionary-based Sentiment Analyzer

Northern Arizona University, individual work, 2021

Course: Programming for Text Analysis

- Created several Python programs and collected Tweets ($N = 3,200$) from Twitter and built a corpus of Tweets
- Created a prototype dictionary-based sentiment analyzer and created a scoring system of the sentiment
- Compared the scoring by the prototype dictionary-based sentiment analyzer against the one by pre-trained machine learning sentiment analyzer
- Discussed the implications for sentiment dictionary building and applied linguistics research

Second Language (L2) English Speaker Analysis

Northern Arizona University, individual work, 2020

Course: Introduction to Language and Linguistics

- Interviewed a non-native English speaker ($N = 1$) and collected the speech data by recording the interview with a semi-structured protocol
- Comprehensively analyzed the speech data at the levels of phonetics and phonology, morphology, syntax, and semantics/lexicon, with the main features listed below:
 - Phonetics and phonology: stress, rhythm, accuracy of vowels, consonants (with accurate transcription using IPA when necessary)
 - Morphology: inflectional and derivational morphemes
 - Syntax: irregular past, comparative and superlative degrees of an adjective, third-person singular form
 - Semantics and word choice: involving correct usage of words
- Described the characteristics of the speaker's speech and summarized the speaker's strengths and weaknesses
- From the perspective of L1-L2 transfer, analyzed the features of the speaker's speech and summarized the features that were rooted in the speaker's first language (L1) and the ones that were independent of the speaker's L1
- Provided a summary of potential instructional priorities on improving the speaker's English speaking

Characteristics of a Reading Comprehension Assessment:

Measures of Validity and Reliability

Northern Arizona University, collaborative work, 2020

Course: Assessment for Second Language Skills

- Developed a test to measure native and non-native English speakers' reading comprehension in the context of academic English ($N = 26$)
- Investigated the validity and reliability of the test
- Examined the test results by referring to descriptive statistics (mean, mode, midpoint, maximum, and minimum) and data distribution (standard deviation, skewness, and kurtosis of the curve)
- Discussed whether there was a statistically difference between the test results of native speakers and those of non-native speakers

Native and Non-native Speakers' Perception of American English Dialects

Northern Arizona University, collaborative work, 2020

Course: Sociolinguistics

- Discussed to what extent both native and non-native speakers perceive different dialects in the US regarding correctness and pleasantness ($N = 54$)
- Performed independent t-tests of correctness and pleasantness scores to examine whether there was statistically significant differences between native and non-native speakers' ratings in terms of correctness and pleasantness
- Discussed the implications for language teaching and teacher training
